

Leaving the Vikings

Denmark, Aarhus 03.03.2018

Dear Foreigner.

I'm happy to meet You right now. Listen carefully to what I have to say to You: I'm settled in Denmark and have lived here for almost 60 Years, without being accepted. This Country has chosen to base its Future in Technology, and I cannot exist in a Country based on control and Screens, so I have to move to another Country.

Who am I? I'm a descended master of the White Hierarchy and have just ended my work in Denmark 01.03.2018. I'm free to go somewhere else now, where I'm needed. It *could* be everywhere on Earth, but it's not, and I require a couple of month to lick my wounds after working among people who does not care if I'm here or not, try to dump my power, or rather see me disappear. Although I *was* almost hidden to do my Job. My Soul was divided into 6 People around the World in the descendens. 4 are now dead, and we are 2 left. I have a Dual in the United States, so I presume my next Job in Love must be in Europe somewhere. I work with Energies and have lifted Denmark into a higher Level of Energy by opening a Portal of Energy and now after 18 Years of "Energybattle" it's done.

My connection to the specific Energies are now closed and meant to open in a new Country because of the Lack of Gratitude and Acceptance of a Master in Denmark. I can hear and see People working with the Light and challenging me, and prefer to do that instead of talking to me standing right beside them. It's a Paradox. So Time's up among the proud Vikings and I'm ready and allowed to do one more Job on Earth before leaving forever. Is it in Your Country?

If you have a Place, small, proper Cottage perhaps, where I can live in a Climate that is not too hot and with a nice view nearby the Sea, no big City around, then let's talk about it. I'm humble and modest, don't need much. You can write to me on this address: raisingthera@raisingtherays.com

I need access to a Computer once in a while but not installed in my home. My Energywork cannot be associated with Technology because it has a higher Frequency than electronic Gadgets and Stuff. And personally I will not spend my last Years on Earth in front of a Screen or with a Robot beside me in my Sofa. I need to live authentic and breathe the Air. Enjoy to be here one last time.

Please write and *be* prepared for an eventually "no, thank you" because, I need the right Place to do what I'm meant to do. It's not a personal denial!

Yours sincerely Ziggy Ziegiet.
